Subject: Fw: Task order forms - Gulfco

PM

Can we discuss?

This is the task we talked about some time ago in relation to Gulfco & checking the contaminants found in sampling against the generator documents in the Casale collection.

Barb A,

See what you think about the attached work request. Will you or Patrice be the COR for this? If Patrice, she should see this too.

Later,

Subject Fw: Task order forms - Guloco

Gary  
see below

Do you think you can write a draft task order for the Guloco task comparing sampling data to the business records?

Re: Fw: Task order forms 

**a Technical Search**

**Performance Requirements:** The Contractor shall prepare and deliver to the government a written report.

**Performance Standards:** Technical Search activity may be tasked to enhance EPA knowledge of standard industry practices, manufacturing techniques, petrochemical processes or any other technical subject in which background information is needed to put site information into context or improve site understanding. Technical Search activity includes research of background information regarding which may range from the acquisition of a single document to extensive research covering many years, securing all relevant documents, indexing, reproducing, organizing and labeling. The Contractor's research scope will be delineated by the COR within the task-specific checklist provided to the Contractor at scoping; the Contractor's deliverable shall comport with the checklist subtasks. The Technical Search Performance Standards Checklist may be found in Appendix Two .

yes - work would be done under technical search.

Subject Fw: Task order forms

Patrice

Under your ESS, what is the definition of sub task **A1d.Technical Search**

If we want to have an analysis done that compares sampling data to possible generator documents (this is Gulfco)

would it go under A1d?

You probably won't need the Checklist but it's attached for future reference.
